

Training: Red Hat
DO409 Automation with Ansible II: Ansible Tower

FORM OF TRAINING	MATERIALS	PRICE	DURATION
Traditional	Hardcopy	1550 EUR	2 days
Traditional	CTAB Tablet	1650 EUR	2 days

LOCATIONS

Krakow - 5 Tatarska Street, II floor, hours: 9:00 am - 4:00 pm

Warsaw - 17 Bielska Street, hours: 9:00 am - 4:00 pm

TRAINING GOALS:

Automation with Ansible II: Ansible Tower (DO409) is designed for IT professionals who use Ansible by Red Hat® and need to centrally manage their Ansible projects in a way that scales to large teams and complex enterprise installations using Ansible Tower by Red Hat.

This Ansible training is based on Ansible Tower 3, Ansible 2, and Red Hat Enterprise Linux® 7.

Audience for this course:

- Linux system administrators, cloud administrators, and network administrators interested in centrally managing Ansible projects and playbook execution at scale with Ansible Tower by Red Hat

CONSPECT:

- Course introduction
 - Introduce and review the course.
- Install Ansible Tower by Red Hat and describe its architecture
 - Explain what Ansible Tower is and demonstrate a basic ability to navigate and use its web user interface.
- Create users and teams for role-based access control
 - Create user accounts and organize them into teams that can be used in conjunction with role-based access control to manage administration and access to organization resources in Ansible Tower.
- Create and manage inventories and credentials
 - Create inventories of machines to manage and set up credentials that will allow Ansible Tower to run jobs on those systems.

- Manage projects for provisioning with Ansible Tower
 - Create basic projects and job templates in Ansible Tower that can be used to run Ansible playbooks in order to provision and configure managed systems.
- Construct advanced job workflows
 - Use additional features of job templates to improve workflows by creating simple job launch forms, templates to launch multiple jobs in sequence, and to report job success or failure through external notification systems.
- Update inventories dynamically and compare inventory members
 - Use advanced techniques to work with inventories, including dynamic generation of inventories from centralized information sources and monitoring of hosts in an inventory for configuration deviations or differences.
- Maintenance and administration of Ansible Tower
 - Perform routine maintenance and administration on Ansible Tower and get a basic familiarity with the command line tools and Ansible Tower API.
- Comprehensive review of provisioning and managing systems using Ansible Tower
 - Demonstrate skills learned in this course by using a provided specification to configure and operate a new organization in Ansible Tower with certain users and teams, an inventory of hosts to manage, and an Ansible project containing playbooks and other supporting files.

REQUIREMENTS:

Red Hat recommends these prerequisites:

- Successfully completed [DO407 Automation with Ansible I](#) or equivalent experience with Ansible, Ansible playbooks, and roles
- Have [Red Hat Certified System Administrator \(RHCSA\)](#) certification in Red Hat Enterprise Linux or equivalent Linux system administration skills

Difficulty level

CERTIFICATE:

Participants will obtain certificates signed by Red Hat.

TRAINER:

Red Hat Certified Instructor.

ADDITIONAL INFORMATION:

Recommended training:

- D007 Ansible Essentials: Simplicity in Automation Technical Overview
- [DO407 Automation with Ansible I](#) or [DO408 Automation with Ansible I with EX407 exam](#)
