

Training: Red Hat
RH318 Red Hat Virtualization

FORM OF TRAINING	MATERIALS	PRICE	DURATION
Traditional	Hardcopy	2100 EUR	4 days
Traditional	CTAB Tablet	2200 EUR	4 days

LOCATIONS

Krakow - 5 Tatarska Street, II floor, hours: 9:00 am - 4:00 pm

Warsaw - 17 Bielska Street, hours: 9:00 am - 4:00 pm

TRAINING GOALS:

Red Hat Virtualization (RH318) helps IT professionals acquire the skills needed to deploy, administer, and operate virtual machines in their organization using **Red Hat® Virtualization**.

This **course** is based on **Red Hat Enterprise Virtualization 4.1** and **Red Hat Enterprise Linux® 7.3**.

Through numerous hands-on exercises, you will deploy and configure **Red Hat Virtualization** and use it to provision and manage virtual machines. This course also prepares you for the **Red Hat Certified Specialist in Virtualization certification exam**.

CONSPECT:

- Red Hat Virtualization overview
 - Explain the purpose and architecture of Red Hat Virtualization.
- Installing and configuring Red Hat Virtualization
 - Install a minimal Red Hat Virtualization environment and use it to create a virtual machine.
- Creating and managing datacenters and clusters
 - Organize hypervisors into groups using datacenters and clusters.
- Managing user accounts and roles
 - Configure user accounts using a central directory service.
 - Assign access to resources based on job responsibilities using roles.
- Adding physical hosts
 - Add additional Red Hat Virtualization hosts automatically, and move and remove hosts from datacenters as needed.

- Managing Red Hat Virtualization networks
 - Separate network traffic into multiple networks on one or more interfaces to improve the performance and security of Red Hat Virtualization.
- Managing Red Hat Virtualization storage
 - Create and manage data and ISO storage domains.
- Deploying and managing virtual machines
 - Operate virtual machines in the Red Hat Virtualization environment.
- Migrating virtual machines
 - Migrate and control automatic migration of virtual machines.
- Managing virtual machine images
 - Manage virtual machine snapshots and disk images.
- Automating virtual machine deployment
 - Automate deployment of virtual machines by using templates and cloud-init.
- Backing up and upgrading Red Hat Virtualization
 - Back up, restore, and upgrade Red Hat Virtualization.
- Exploring high-availability practices
 - Explain procedures to improve resilience and reliability of Red Hat Virtualization by removing single points of failure and implementing high-availability features.
- Comprehensive review
 - Demonstrate skills learned in this course by installing and configuring Red Hat Virtualization, using it to create and manage virtual machines, and by backing up and updating components of Red Hat Virtualization.

REQUIREMENTS:

- [Red Hat Certified System Administrator \(RHCSA®\)](#) **certification** or equivalent experience.

Difficulty level

CERTIFICATE:

Participants will obtain certificates signed by Red Hat.

TRAINER:

Red Hat Certified Instructor.
