TRAINING GOALS:

Zend PHP Certification is globally recognized as the industry standard for benchmarking and validating PHP expertise. Developed specifically by Zend Certified Engineers (ZCE) and members of the Certification Advisory Board, this course prepares experienced PHP programmers for the challenge of passing the PHP certification exam. This is a test preparation and review course designed for advanced PHP developers. The course will guide you through an in-depth, intense review of all of the major topics within the ten certification areas. Plus, it contains important information about the exam itself and strategies for answering the exam questions. Participants are continually challenged to test their knowledge with focused quizzes.

What will I learn:

- Reviewing all ten areas of the certification with your instructor, you will be able to prepare for the exam and identify areas requiring further study. Numerous quizzes given by an experienced ZCE instructor let you practice in a setting and style of the actual exam. Complete mock certification exams provide even further practice with the content and strategy for the exam, increasing your chances of success.

What will I be able to achieve:

- Know what to expect during the Zend PHP Certification testing process and the exam itself
- Learn strategies for answering the exam questions
- Learn best practices for making best use of available exam time

- Review the 10 major topic areas of the certification exam
- Take numerous review quizzes in the style of the exam questions
- Be more prepared to pass the exam and achieve the status of ZCE.

Audience:

- This course moves at a fast pace and assumes at least an intermediate to advanced skill level in PHP programming. Candidates taking the certification exam need to be proficient in all 11 areas covered by the exam.

CONSPECT:

- INTRODUCTION TO CERTIFICATION
 - About the Certification
- PHP CERTIFICATION FOCUS AREAS
 - PHP Basics
 - Functions
 - Data Formats and Types
 - Web Features
 - OOP
 - Security
 - Strings and Patterns
 - Databases & SQL
 - Arrays
