LOCATIONS

Krakow - 5 Tatarska Street, II floor, hours: 9:00 am - 4:00 pm
Warsaw - 17 Bielska Street, hours: 9:00 am - 4:00 pm

TRAINING GOALS:

Learn how to write application programs that use Data Language One (DL/I) to process Information Management System (IMS) databases.

- Describe the basic differences between files and IMS databases as they relate to application program coding and logic
- Describe the terms and processing characteristics of IMS hierarchic data structures
- Construct DL/I calls for either COBOL or PL/I language programs
- Write, test and debug a batch application program that uses the DL/I call functions
- Use the IMS Test Program to prototype application program calls, and to perform ad-hoc read and update access to an IMS database
- Describe the applications and uses of other DL/I features
- Program for recovery and restart using DL/I calls to establish synchronization points
- Describe the functions provided by High Availability Large Database (HALDB), and any program differences when accessing a Full Function database or a HALDB

This is an intermediate course for individuals who write programs in Common Business Oriented Language (COBOL), or Programming Language One (PL/I), or Assembler language using DL/I to navigate through an process IMS databases.

CONSPECT:

- DL/I Environment
- DL/I Call Processing
- DL/I Retrieval Calls
○ DL/I Update Calls
○ DL/I Programming Techniques: Part 1
○ DL/I Advanced Segment Search Arguments SSAs: Part 1
○ DL/I Test Program
○ DL/I Programming Techniques: Part 2
○ DL/I Advanced Segment Search Arguments SSAs: Part 2
○ System Service Calls
○ Programming Standards
○ High Availability Large Database (HALDB) Access

REQUIREMENTS:

You should complete:

○ *IMS Fundamentals (CM010)* or *IMS Fundamentals - Web - ILO (CMW01)*

and a COBOL or PL/I language course, or be able to:

○ List the basic components of the IMS database system
○ Construct a non-DL/I application program in COBOL or PL/I

Difficulty level
