TRAINING GOALS:

The Netskope Security Cloud Operation and Administration (NSCO&A) course is an in-depth training on the Netskope Security Cloud led by a Netskope expert.

In this course, you will learn how Netskope helps IT professionals gain greater visibility and actionable information about cloud services, activity, and data in your cloud.

The course begins with an introduction to the Netskope platform and the user interface. The course will then cover key aspects of the platform such as policy creation, DLP, Threat Protection, Netskope NG-SWG, securing data in the public cloud using Netskope, generating reports and analysis and other key features. The course will provide examples and hands-on practice on how to enforce policy on any one or combination of granular factors such as service, category, user, group, device, content, data loss prevention (DLP) profile, and more.

Objectives

Upon completion of this course, attendees will be able to:

- Understand the unique use cases covered by the Netskope Security Cloud
- Administer Netskope in all deployment modes

- Utilize Netskope features to assess the level of Software as a Service (SaaS) risk in an organization
- Secure traffic to and from a range of websites and cloud applications
- Secure public cloud resources
- Create granular security policies
- Restrict the use of cloud applications and services to business approved providers and instances
- Investigate incidents using reporting and analytics capabilities

Target Audience

Security administrators; network administrators; sales engineers; pre-sales support; post-sales support.

CONSPECT:

- Chapter 1: Netskope Platform Architecture
- Chapter 2: User Management
- Chapter 3: Traffic Steering
- Chapter 4: Netskope Client
- Chapter 5: Real-time Protection Policies
- Chapter 6: Web Security
- Chapter 7: Netskope Cloud Firewall
- Chapter 8: DLP
- Chapter 9: Threat Protection
- Chapter 10: API-enabled Protection
- Chapter 11: Netskope IaaS
- Chapter 12: Reporting
- Chapter 13: Netskope Advanced Analytics

REQUIREMENTS:

Recommended pre-requisites: Netskope Security Cloud Introductory Online Technical Training. Additionally, some experience with the Netskope platform is preferred. Furthermore, the course is designed for attendees that have a thorough understanding of networking technologies and security concepts. Experience with other security technologies (IPS, proxy, and content filtering) is a plus.

Difficulty level

CERTIFICATE:

Upon successful completion of the Netskope Administrator Accreditation exam the participants will obtain certificates signed by Netskope.
