Training: Huawei
HCIA-Storage

TRAINING GOALS:

Huawei Certified ICT Associate-Storage positioned as training and certification for engineers who have basic knowledge about storage technologies and basic product O&M management capabilities.

Objectives

After completing the training, you will be able to:

- Understand definitions of information and data.
- Understand development trends of data storage products.
- Understand functions and components of controller enclosures and disk enclosures.
- Understand concepts of scale-up and scale-out, as well as related cables and interface modules.
- Understand working principles of RAID 2.0+.
- Understand dynamic RAID and RAID-TP.
- Understand common protocols used in storage systems.
- Understand working principles and characteristics of different protocols.
- Understand storage network architecture evolution.
- Understand storage networking technology evolution.
- Be familiar with the features and positioning of storage products.
- Understand DeviceManager, CLI, and UltraPath storage system management tools.
- Understand service characteristics, implementation principles, and application scenarios of resource tuning technologies.
- Understand service characteristics, implementation principles, and application scenarios of data protection technologies.
- Be familiar with common storage system O&M management tools and typical O&M processes.

Target Audience

- Personnel who want to become storage engineers
- Personnel who want to obtain HCIA-Storage V5.0 certification
